QUICK GUIDE

LOOPS AS A SAFETY NET

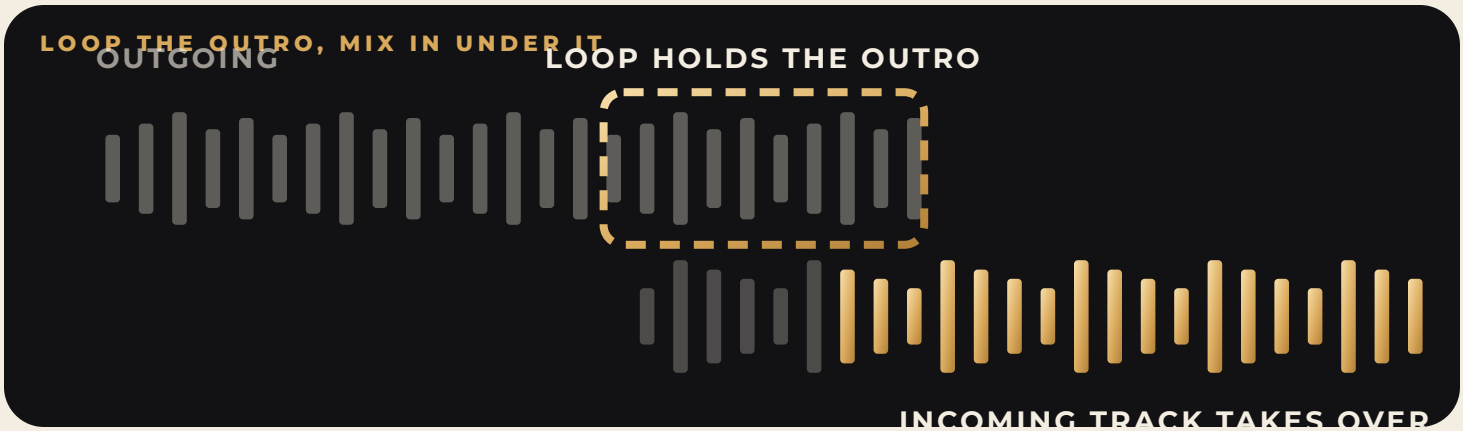

What it is, how to spot it and what to do with it.

WHAT IT IS

A loop repeats a section of a track for as long as you want. Looping the outro gives you extra time to bring the next track in on the right beat.

WHAT YOU'LL NOTICE

Calm and in control. The music keeps going while you set up the next move.

01

LOOP THE LAST BARS

Hold a short outro on repeat so the track never ends on you.

02

START THE NEXT TRACK ON A CUE

Launch it from a phrase-aligned hot cue and mix it in.

03

RELEASE ON BAR ONE

Exit the loop on the first beat of the next phrase.

DO THIS TONIGHT

Loop the last four bars, bring in the next track, release on bar one.

- [ ] Set a four-bar loop near the end of the outgoing track.
- [ ] Start the incoming track from a hot cue.
- [ ] Release the loop on bar one of the next phrase.

PRACTICE & CHECK

LOOPS AS A SAFETY NET: YOUR TURN

WHERE YOU'LL MEET IT AS A DJ

- Holding a short outro while the next track arrives.
- Shortening a loop to build tension before a drop.
- Fixing an intro that is longer than you expected.

QUICK CHECK

1. What does looping the outro give you?

2. Where should you release the loop?

3. How do you start the incoming track?

Answer key: 1) More time to bring in the next track. 2) On bar one of the next phrase. 3) From a phrase-aligned hot cue.

REMEMBER

A loop gives you time. Use it on purpose.
