QUICK GUIDE

ONE EFFECT, ONE JOB

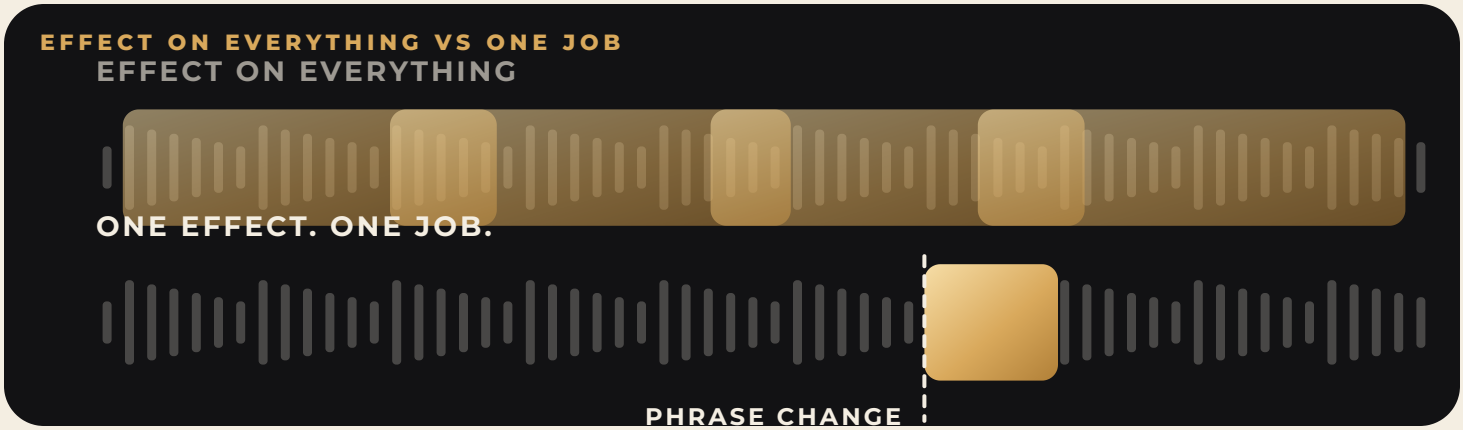

What it is, how to spot it and what to do with it.

WHAT IT IS

Effects such as echo, flanger, phaser and noise risers add movement to a mix. They work best when each one has a clear job and is used briefly, in time with the music.

WHAT YOU'LL NOTICE

Intentional. The effect adds a moment instead of hiding a problem.

01

SHORT AND IN TIME

Keep effects tempo-synced and tied to phrase changes.

02

PICK THE RIGHT TOOL

A flanger works as a short burst. A phaser suits a slow blend.

03

BUILD, THEN RELEASE

A riser leads into a phrase change, then it stops.

DO THIS TONIGHT

Blend one pair of tracks three times, with a different single effect each time.

- [ ] Pick one pair of tracks and one effect.
- [ ] Use the effect only on the phrase change.
- [ ] Record all three and keep the cleanest one.

PRACTICE & CHECK

ONE EFFECT, ONE JOB: YOUR TURN

WHERE YOU'LL MEET IT AS A DJ

- A short flanger burst across a transition.
- A phaser under a long, slow blend.
- A riser that builds into a phrase change.

QUICK CHECK

1. What should effects be synced to?

2. Which effect suits a slow blend?

3. What is a common effects mistake?

Answer key: 1) The tempo and the phrase change. 2) A phaser. 3) Using one on every transition.

REMEMBER

If it has no job, turn it off.
