QUICK GUIDE

HALF-TIME AND DOUBLE-TIME

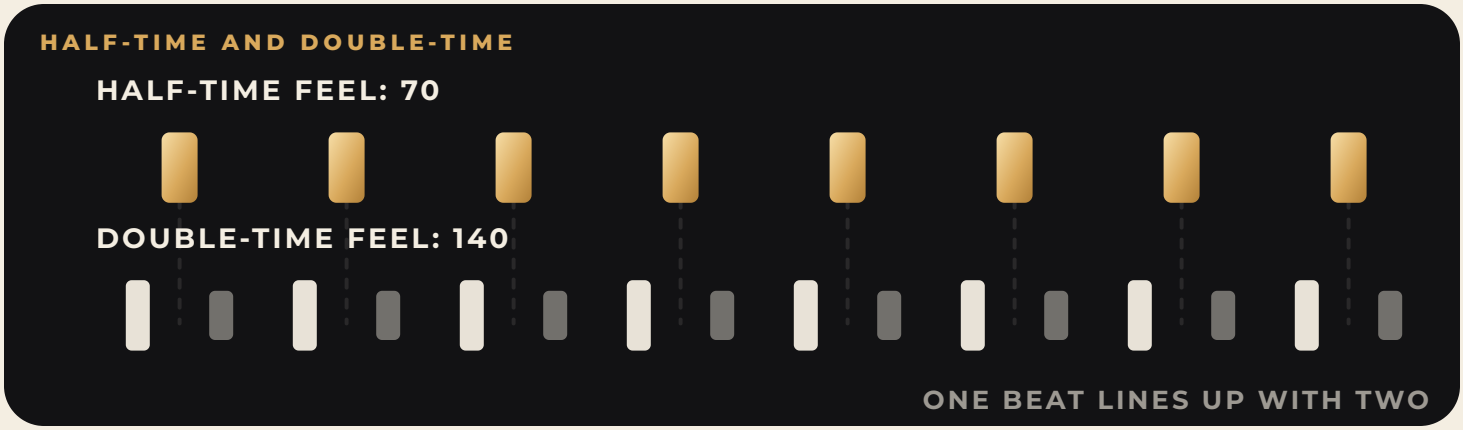

What it is, how to spot it and what to do with it.

WHAT IT IS

A track at half or double the tempo of another can be mixed without changing the pitch much. One bar of the slower track lines up with two bars of the faster one.

WHAT YOU'LL NOTICE

Surprising and smooth. The tempo changes, but the groove carries on.

01

EXACT HALF OR DOUBLE

70 and 140 line up. One slow beat equals two fast ones.

02

FEEL THE TEMPO

A track labeled 140 can feel like 70. Trust what you feel.

03

BRIDGE TRACKS HELP

Pick a track in between, or cut to a beatless break.

DO THIS TONIGHT

Mix a 75 BPM track into a 150 BPM track with a quick cut.

- [ ] Find two tracks where one is about half the other.
- [ ] Line up one slow beat with two fast beats.
- [ ] Switch with a quick cut, not a long blend.

PRACTICE & CHECK

HALF-TIME AND DOUBLE-TIME: YOUR TURN

WHERE YOU'LL MEET IT AS A DJ

- Moving from a slow genre into a fast one.
- Using a track in between as a bridge.
- Cutting from a beatless break into the new tempo.

QUICK CHECK

1. What lines up with 140?

2. What does 'feel the tempo' mean?

3. What helps across a big BPM gap?

Answer key: 1) 70, which is half-time. 2) Trust the felt tempo, not the label. 3) A bridge track or a quick cut.

REMEMBER

Half is double. Trust the feel.
