QUICK GUIDE

SET ENERGY ARC

What it is, how to spot it and what to do with it.

WHAT IT IS

An energy arc is the shape of a set over time. It usually opens low, builds, peaks and then closes, with a breather before the biggest moment.

WHAT YOU'LL NOTICE

A journey. The night feels planned, even when you improvise.

01

KNOW YOUR SLOT

Warm-up sets the tone. Peak time brings the energy.

02

RATE EACH TRACK

Score energy from 1 to 10 and move one step at a time.

03

PLAN CLUSTERS

Group tracks that work together. Leave room to improvise.

DO THIS TONIGHT

Pick 25 tracks, score each for energy, and build three different arcs.

- [ ] Choose 25 tracks and score each for energy.
- [ ] Sketch an arc: open, build, peak, close.
- [ ] Build the set and keep a safety crate ready.

PRACTICE & CHECK

SET ENERGY ARC: YOUR TURN

WHERE YOU'LL MEET IT AS A DJ

- Planning a warm-up set that doesn't burn the best tracks.
- Choosing the next track by its energy score.
- Keeping a safety crate for when the plan changes.

QUICK CHECK

1. What does a warm-up set do?

2. How do you move through energy levels?

3. Do you plan every minute?

Answer key: 1) Sets the tone, not the peak. 2) One step at a time. 3) No. Plan clusters and leave room to improvise.

REMEMBER

Shape the night. Don't spend it all early.
