QUICK GUIDE

TRAIN WRECK RECOVERY

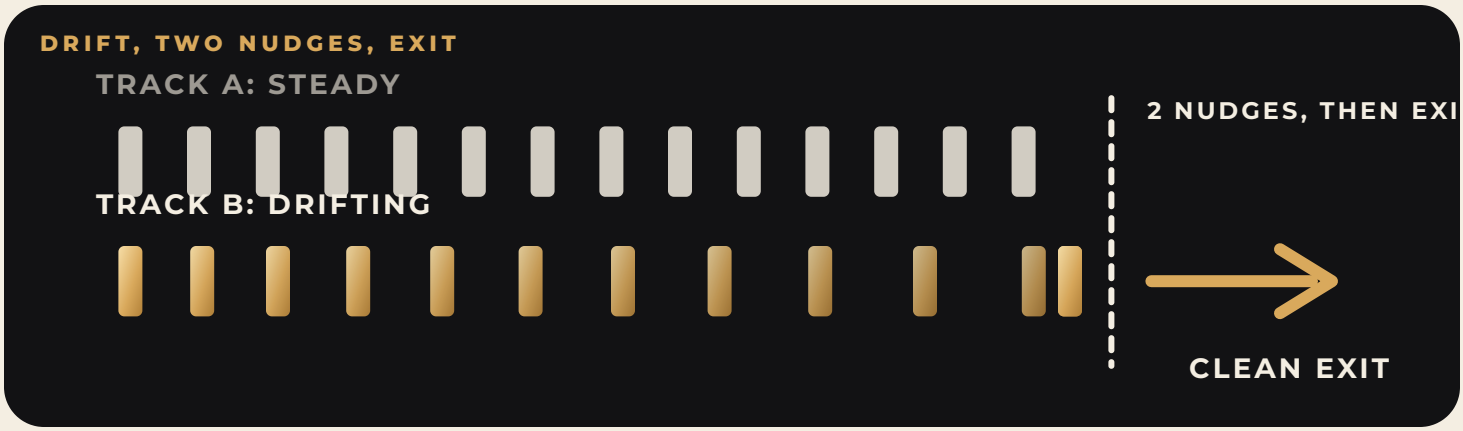

What it is, how to spot it and what to do with it.

WHAT IT IS

A train wreck is a blend where the two tracks drift apart. A clean recovery means choosing the stronger track, fading the other and moving on without drama.

WHAT YOU'LL NOTICE

Calm. The mistake is over in a bar and the music keeps going.

01

RETRY IF THERE'S TIME

If the outgoing track still has room, re-cue and try again.

02

KEEP THE STRONGER TRACK

Pull the other one down over a bar.

03

TWO NUDGES, THEN EXIT

If the drift grows after two nudges, bail out.

DO THIS TONIGHT

Record a deliberate train wreck and practice the clean exit.

- [ ] Mix two tracks with the grids slightly off.
- [ ] Nudge twice. If it still drifts, pull one track down.
- [ ] Reset your effects before the next track.

PRACTICE & CHECK

TRAIN WRECK RECOVERY: YOUR TURN

WHERE YOU'LL MEET IT AS A DJ

- Exiting a blend that keeps drifting.
- Using echo or filter to hide a rough moment, then resetting them.
- Keeping one deck playing when something fails.

QUICK CHECK

1. How many nudges before you exit?

2. Which track do you keep?

3. What should you do with effects afterwards?

Answer key: 1) Two. 2) The stronger one. 3) Reset them before the next track.

REMEMBER

Exit early. Stay calm. Keep the music going.
