QUICK GUIDE

QUICK CUT TRANSITION

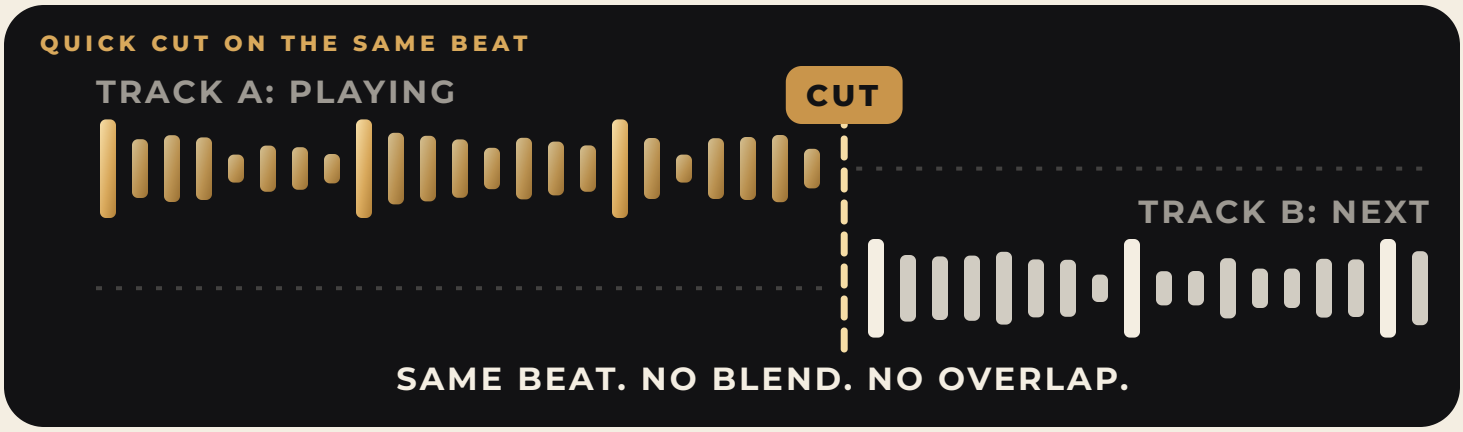

What it is, how to spot it and what to do with it.

WHAT IT IS

A quick cut switches from one track to the next instantly, on a chosen beat. There is no blend, no overlap and no effect, just a clean, sudden change.

HOW IT SOUNDS

Sharp, sudden and high energy. It feels like a hit.

01

CUT ON THE BEAT

Track A stops and Track B starts on the same beat.

02

MATCH THE TEMPO

The same BPM on both tracks keeps the grid locked.

03

CUE THE EXACT SPOT

Set a cue on the first beat of the new section.

DO THIS TONIGHT

Cut on the first beat of a new phrase and the crowd will feel it land.

- [ ] Find your cut point in Track A, like the end of a build-up.
- [ ] Cue Track B on its first beat and match the BPM.
- [ ] Start Track B on the beat and pull Track A out at the same moment.

PRACTICE & CHECK

QUICK CUT TRANSITION: YOUR TURN

WHERE YOU'LL MEET IT AS A DJ

- Drop to drop, when one big moment hands over to the next.
- Build-up to drop, landing the new track right on the first beat.
- Edits and short sets where you want to keep the energy up.

QUICK CHECK

1. What does a quick cut skip?

2. What must match for a quick cut to sound clean?

3. What helps you hit the exact spot?

Answer key: 1) The blend. There is no overlap or effect. 2) The beat and the tempo. 3) A cue point on the first beat of the new section.

REMEMBER

Match the beat. Cue the spot. Cut with confidence.
